SUMMARY

As a B.E. Software Engineering student, my career objective is to become a skilled software developer, contributing to innovative projects and leveraging my technical expertise to create high-quality software solutions in a collaborative and challenging environment. I have industry level experience with Node.js and Nest.js as well as relational and non-relational databases, which I aim to further utilize and enhance in real-world development scenarios.

PROFESSIONAL EXPERIENCE

Digital Team **Karachi, Pakistan**
Backend Developer *July 2025 – Present*

- Contributed to the development and maintenance of a financial **reconciliation system**, focusing on backend operations.
- Worked with **large datasets**, ensuring accurate data processing and smooth system performance.
- Collaborated with cross-functional teams to **debug, optimize, and improve backend workflows**, enhancing overall **system reliability and scalability**.

The Marksman Arena **Karachi, Pakistan**
Backend Developer Intern *Feb 2025 – April 2025*

- **Collaborated** in the **ERP software migration** for *The Marksman Arena*, focusing on backend development.
- **Developed** key modules like **Users** and **Ledgers**, and implemented **secure authentication middleware** for user validation and access control.
- Created **reusable utility functions** to enhance **code reusability** and improve **developer efficiency** across the backend team.

EDUCATION

PAF KIET (Karachi Institute of Economics and Technology) **Sep 2022 - Present**
Bachelor of Engineering in Software Engineering
CGPA: 3.2

SKILLS

Backend: Nest.js, Node.js, Express.js, RESTful APIs, MySQL, MongoDB, Prisma ORM
Programming Languages: JavaScript, TypeScript, SQL
Version Control: Git, GitHub
